Marlene B. Brown
Executive Director,
The Children's Museum of
History, Science & Technology
311 Main Street
Utica, NY 13501

Dear Marlene:

The Children's Museum serves as a valuable learning center for the many children and families that Kids Oneida serves each year.

The Museum has been a hands-on learning center with its emphasis on local history, environmental science, the arts, and space science. It's Educational Enrichment Programs go hand in hand with the curriculum that children are taught each day in school.

On behalf of Kids Oneida please accept this letter of support for much needed funding and for the children and families that it would serve in our community.

Sincerely,

Robert J. Roberts III
Chief Operating Office
