The Children's Museum  
311 Main Street  
Utica, NY 13501

To: Marlene B. Brown, Exec. Dir. and Staff  
Subject: Museum Appreciation

Dear Marlene,

I would like to express that "The Children's Museum" is a very extraordinarily museum of History, Science and Technology. The Museum is the most unique educational center in North America for the fact it allows the children (and adults) to interact and participate with several science and technology displays.

The center's interactive displays also do an excellent job introducing the children to services in every day life they will experience, as they become adults.

My little buddy "Dominic" (near seven years old) is always so excited to attend events and interact with the displays at the Museum. The Museum has helped him in his learning process. Dominic loves the Magic Show.

The Children's Museum is a definite asset to Utica, Oneida County, New York State and beyond!! I believe the Museum should be included in the stimulus package provided by the Federal Government (our tax dollars).

Dominic and I look forward as always, to attend "The Children's Museum" soon.

Best Regards,

Joseph A Surace
